**Computerizing Dispatcher Operations per the Prototype**

welcome!

After adopting JMRI and PanelPro for my own use, with extensive feedback from others online, I wanted to "give back" to the JMRI community by sharing some links I found useful.

Why do I like PanelPro? a) it's free; b) it works on multiple platforms; c) it supports multiple users; d) it works over the Internet; e) it is extremely flexible and extensible; f) there is great programmer and peer support; g) many others use it. Did I mention it was free?

**PanelPro Examples:**

- Mark Bridgewater's Feather River Route.
- Jerry Britton's PRR Eastern Region - Scroll down to the section on PanelPro.
- Robert Bucklew's Quaker Valley Lines.
- Nick Kulp's Cornwall Railroad.
- Patrick Lana's Cedar River and Iowa Central.
- Kent Williams' Oregon Washington Navigation & Railway.

**PanelPro Tutorials and Tips:**

- Jerry Britton's JMRI Tips.
- Nick Kulp's JMRI PanelPro Clinic.
- Nick Kulp's CMRI PanelPro Clinic.
